

PRESS RELEASE

FOR IMMEDIATE RELEASE

Tony Tiyou founder of **Renewables in Africa (RiA)** releases ‘**The Wind Industry Outlook in Africa**’ Book

London, UK, December 13, 2017 — Africa is blessed with an enormous amount of renewable energy resources that could be harnessed to fill the needs of African people. Especially needs that are connected to the pressing challenge of electrification of the continent. Much has been documented about the status of solar but very little is known about the wind Industry in Africa. This book from **Tony Tiyou** from **Renewables in Africa (RIA)** is designed to close the gap.

The book is divided in five sections: Resources, Markets, Players, Outlook and Personal Call to action. The book is gathering information collected from reputable sources and presents them in a single platform to enhance awareness of the Wind industry. The book is open to all the willing individuals who want to expand their knowledge of the sector in Africa. It would be particularly beneficial to three groups of people:

- Projects developers and investors
- Policymakers and NGOs
- Researchers and students

After a brief reminder of conditions to generate wind energy, the first section is localising the resources in the continent. Following that, the second section looks at the continental and regional markets and the third one reviews the main players, acting in the industry. The fourth section presents an outlook of the market until 2040 including elements that influence this projection and the final section is a personal reflection of the author of how to grow the industry.

Don't struggle anymore to learn about one of the most abundant clean energy source of Africa and get a copy of this book available on **RiA** and **More Books** platforms.

About Tony Tiyou

Tony Tiyou is the owner of O'wango & TT Smart (O&TT Smart), an engineering consultancy that provides Clean Energy solutions to businesses in UK and Africa.

He holds triple Master's Degrees from Cranfield University (UK), Ecole Centrale de Lille (France) and Faculte Polytechnique de Mons (Belgium) and a Recognized Renewable Energy Expert from the European Energy Centre (UK).

Prior to Energy management, he previously worked for a decade in the Automotive Industry.

In 2016, Tony launched Renewables in Africa (www.renewablesinafrica.com), the expert blog which vision is to transform Africa and Africans lives by leveraging the Power of Renewable Energy.

Tony is a member of the Energy Manager Association (UK) and a strong advocate of Clean Energy.

Tony is also the co-Director of the Reach Society, a social enterprise that was awarded in 2017 a The **Queen's Award for Voluntary Service** (which is the MBE for volunteer groups).

About Renewables in Africa (RiA)

Renewables in Africa is the expert blog about Renewable Energy in Africa, launched by Tony Tiyou from O'wango & TT Smart (O&TT Smart). The ambition is to Raise the Technical Awareness about Clean Energy and Energy Management in the African Continent and disseminate the information. As much as helping businesses primarily, it is also about getting the civil society understanding what they need, what they buy and to some extent as well, how to better use this energy.
